

INSTALLATION INSTRUCTIONS

Thank you for choosing a Marble Factory jetted tub. All of our tubs are inspected and water tested before leaving our factory. At the time of delivery please inspect your jetted tub for any damage, as all claims must be reported to the carrier at this time. Our pumps are tested and factory sealed, eliminating any need of disconnecting the pump. In doing so, you would void the factory warranty. If any problems occur with the pump or fittings please call for an authorized technician to rectify the situation. For further information, call our toll free number, 1-800-243-4137.

HOW TO PREPARE FOR INSTALLATION OF YOUR NEW MARBLE TUB

All outside walls must be completely sealed according to the local construction codes. Please ensure that the wall is:

- Insulated
- Complete with vapor barrier
- Drywalled and taped
- Caulked at all potential draft areas

All cantilevered areas must be completely insulated and adequately heated.
