Available in all colors. Call 403-279-2552 for current pricing and volume discounts or visit our website www.marblefactory.com

Custom Shower bases or pans can be ordered to your specifications. Please provide all outside dimensions from wooden studs or steel framing. Provide the center line location for the drain. If custom angles or out of square situations occur, a full size template maybe required for our fabrication department. A built in tile flange will be installed where the base meets a wall. The curb will be installed for a threshold, there will usually be shower glass or an entrance way to the shower at the threshold. An optional wheel chair ramp is also available if required. Please see document "wheel chair ramp" for specifications. Below are drawings of common Custom Base configurations. If you don't see your particular design please send us a sketch of what you need and we will send you a quote.

Common Custom Configurations

Custom Base Inclusions

Note crating is extra and will be quoted prior to order acceptance.
